

Cooling rebate incentives and conditions

For a limited time, earn a 50% bonus for rebates when completing cooling retrofits. Upgrades must be completed and submitted for payment by November 15, 2021.

Equipment upgrade	Description	Incentive		Limited time incentive
Programmable thermostat	Replace a fixed/manual thermostat with a programmable or learning thermostat. Replacement of an existing programmable or learning thermostats does not qualify.	\$100	per ton	\$150
Install economizer	Add an economizer to an existing unit where an economizer previously did not exist or replace a non-functioning economizer with a new one. Replacement of a functioning economizer does not qualify.	\$50	per ton	\$75
Integrate economizer with DX	Program economizer to operate integrally with mechanical (DX) cooling. That is, economizer and mechanical cooling should operate simultaneously when advantageous. New air handlers do not qualify.	\$40	per ton	\$15
Demand control ventilation (DCV)	Add sensors, controls, and sequences for demand control ventilation. Locate CO2 sensor in occupied space or return air duct and reduce outside air requirements when appropriate (low CO2 indicating low occupancy). Existing DCV systems do not qualify.	\$20	per ton	\$30
Variable speed supply fan	Convert a constant speed RTU to variable speed. Rebate applies to adding a VFD to an existing motor, or replacing induction motors with EC motors. Existing functioning VFDs and EC motors do not qualify.	\$200	per hp	\$300
Advanced RTU Controller	Add-on controls for an existing RTU that implements integrated economization, variable fan speed control, and demand control ventilation (DCV). Examples include (but are not limited to) Transformative Wave Catalyst and Bes-Tech Digi-RTU. Existing hardware can be utilized for functionality and new hardware installed to achieve functionality qualifies for additional rebates above.	\$200	per ton	\$300

Evaporative Condensing	Evaporative media or mist to pre-cool air entering the condenser of a rooftop unit (RTU) or air-cooled chiller. In the unlikely event that the evaporative equipment damages a condenser or part of a condenser and it is less than 15 years old, the manufacturer shall replace the condenser or damaged part of the condenser and pay for the cost of the study to determine the cause of failure.	\$400	per ton	\$150
Evaporative Cooling	Direct, Indirect, or Direct/Indirect (IDEC). Continuous water 'bleed' systems for sediment control DO NOT qualify. A maintenance plan is required including winterization, startup, and guarantees for air quality (e.g. bacteria, mold).	\$0.20	per cfm	\$0.30

Additional requirements

Limited time 50% bonus incentive details and requirements:

Starting June 1, 2021 Efficiency Works Business is offering a 50% bonus on rebates for efficiency upgrades in the following categories: Food Service, Grocery, Office and appliance, Building envelope, Cooling, VFDs and Water retrofits. To qualify for the bonus efficiency retrofit incentives, upgrades must be completed and submitted for payment by November 15, 2021.

- Qualifying rebate categories: Food Service, Grocery, Office and appliance, Building envelope, Cooling, VFDs and Water retrofits
- Electric efficiency incentives are available to commercial electric customers of Estes Park Power and Communications, Fort Collins Utilities, Longmont Power & Communications or Loveland Water and Power
- Water efficiency incentives are available to commercial water customers of Fort Collins Utilities, City of Longmont or Loveland Water and Power
- Bonus does NOT apply to lighting retrofits, custom upgrades, new construction projects, or building tune-up incentives
- Efficiency projects started after June 1, 2021 are eligible based on a rebate pre-approval date or the date listed on the contract (invoice) if the project did not require preapproval
- Total incentive amounts over \$10,000 require pre-approval before efficiency upgrades begin
- Upgrades must be completed and submitted for payment on or before November 15, 2021
- Total incentives are limited to 100% of a project total upgrade cost
- Efficiency Works Business maximum incentive limits will apply per project and customer per calendar year
