

Custom incentives and conditions

Category	Incentive	Criteria
Energy	\$0.10 per kWh per year saved	Must save a minimum of 1,000 kWh/year
Demand	\$500 per kW saved	During summer peak period (weekdays, June-August, 3pm-6pm), discounted for equipment duty cycles and any other factor reducing consistent coincident peak demand savings.
Water	\$10 per 1,000 gallons per year saved	Fort Collins Utilities water customers only

Additional requirements

The custom rebate is the greater of the energy, demand, and water rebate. Caps are 75% of project cost and a one year simple payback (whichever is less). Projects may not qualify if the simple payback is greater than 15 years or longer than the product's expected life.
